## SUMMARY

---

Certified Tableau Desktop Specialist with 5.6 years of experience in building dashboards, managing data pipelines, and delivering reporting solutions using SQL, Tableau, and Python. Lead cross-functional projects focused on business impact. Skilled in stakeholder requirement gathering, query optimization, and reporting automation. Strong in KPI analysis, data issue resolution, and building secure dashboards that improve access and reduce manual effort. Proven record of driving measurable outcomes through data.

## SKILLS

---

**Technologies:** Tableau, Advanced Excel, Gen AI

**Languages:** SQL, Python

**Analytics:** Data visualization, ETL automation, Data Modeling

**Interpersonal:** Leadership, Adaptability, Problem-Solving, Attention-to-detail

## WORK EXPERIENCE

---

**Business Analyst**

**Genpact**

**May 2024 - Present**

**Gurgaon, India**

- **Lead daily statistical analysis and dashboard projects** across operations and financial services.
- **Maintain 120+ SQL pipelines and 100+ views** to track KPIs across real-time business processes.
- **Build and automate Tableau dashboards** with dynamic filters, parameters, and LOD expressions.
- Apply **row-level security and schedule extracts** to ensure controlled and current data access.
- Monitor and improve **ETL workflows involving 1M+ records** in collaboration with data engineering team.
- Use Tableau to deliver business-critical dashboards that **reduced manual reporting by 30%**.
- Forecast cost trends using **predictive models with 90% accuracy** to support planning.
- **Identified \$500K+ revenue leakage** through data analysis and supported business fixes.
- Perform **root cause analysis** to **identify trends, outliers**, and operational issues.
- **Work closely with cross functional teams** across functions to ensuring end to end data driven solutions.
- Conduct **one-on-one collaboration with business stakeholders** to review metrics, validate output, and incorporate feedback.

**Tableau Developer**  
**Vak IT Systems**

**Feb 2020 – Mar 2024**  
**Hyderabad, India**

- **Designed SQL-based ETL processes** to extract and transform data from multiple systems.
- **Built Tableau dashboards** to support business reviews, and performance tracking.
- Conducted **requirement gathering sessions** with business users and translated them into dashboard specs.
- **Used complex SQL queries** with joins, **window functions**, and **CTEs** to generate reporting datasets.
- Applied **data security** protocols including **row-level security** in **Tableau dashboards**.
- **Improved dashboard performance** using data extracts and clean visualization design.
- Built **dynamic dashboards with filters and parameters** for user-driven exploration.
- Analyzed sales and placement data to uncover trends, **resulting in \$100,000 profit growth**.
- Delivered **dashboards aligned to business KPIs** and ensured **accuracy** through testing.
- **Partnered with other developers and stakeholders** to improve dashboard adoption and usability.

**EDUCATION**

---

**SRM University, B. Tech, Mechanical Engineering**

**Chennai, 2015 – 2019**

- GPA 7, In charge of sports house Prithvi (2018)
- Specialized in Data Analytics and Research

**PROJECTS**

---

**Sales Analysis of Ford Stores**

**Nov 2023**

Built interactive Tableau dashboards to analyze regional sales, profit trends, and product performance for Ford dealerships.

**Automotive Analysis**

**Mar 2024**

Explored vehicle sales patterns using Tableau to highlight manufacturer-wise trends, model popularity, and revenue drivers.
